Welcome to my web page! I am currently a first semester Graduate student in the Information and Communication Technologies program at UW-Stout. Feel free to look around. I have information relating to ICT in general, my current career, courses I have taken, program and visual communication competencies (including artifacts) and links to other sites within the ICT world. If you have any questions, feel free to contact me!

- ❖ **Email: Couillardc@my.uwstout.edu**
- ❖ **Phone: 608-957-9381**
- ❖ **Links to LinkedIn, Facebook, & Twitter!**

A little more about me…

Some of my interests include: reading, writing, cooking for friends and family, playing racquetball, hiking, and swimming! I enjoy being outside and I love going camping in the summer. I love sports and I am a huge Green Bay Packer and Wisconsin Badger Fan!

Program Goal

The main goal of my program is to increase my knowledge of technology as it relates to communication and mass media. I hope to gain technical writing skills, web design and development skills, and video production skills. The information and tools that I have to work with will further my career development and hopefully lead to a successful career as a communications specialist.

Definition of ICT

Information and Communication Technology deals with the convergence of Information Technology and Telecommunication Systems. This broad term and field of study now deals with all technical means of processing and communicating information.
